BRAND STORY

MISSION & WORLD

THE FORGE

V1 — BRAND GUIDELINES

STORY

Forge AI is the heat, the pressure, the repetition until something real holds its shape. Not a tracker — a forge for who you're becoming.

Every rep, every rest day logged, every streak kept is another pass under the hammer. The app doesn't celebrate effort for its own sake — it watches the shape change. Slowly. Honestly. Without flattery.

Forge AI exists for people who already know that change is forged, not found. They don't need motivation — they need a record, a rhythm, and something that won't let them lie to themselves about day 12 vs day 47.

HEAT // PRESSURE // REPETITION

MISSION

Give people a single honest surface for the work — streaks, sessions, mood, programs — lit like a workshop at midnight. No badges for showing up. The shape is the reward.

WHO IT'S FOR

- Athletes and lifters mid-program, tracking real numbers
- People rebuilding a habit after a break — no shame, just resume
- Anyone who wants quiet structure over loud encouragement

WORLD

Late workshops, dawn gyms, single-screen glow. One light source. No clutter. The work, lit. Forge AI's interface borrows from the physical spaces where real work happens after hours — dark rooms, one bright tool, everything else fading into the background until it's needed.

"Heat doesn't ask permission. Neither do you." — every line of copy should sound like it could follow that sentence.

01 — DIRECT

Say what happened. No hedging, no qualifiers, no "maybe consider."

- ✓ "47-day streak. Longest yet."
- ✗ "Wow, you're crushing it! 47 days and counting!! 🔥🔥"

02 — UNSENTIMENTAL

Facts over feelings. A missed day is a missed day, stated plainly.

- ✓ "Missed yesterday. Streak reset to 0."
- ✗ "Don't worry, everyone has off days! Tomorrow's a new start :)"

03 — EARNED

Praise is reserved for real thresholds — PRs, milestones, completed programs. Never for showing up.

- ✓ "Personal best: 82.5kg squat."
- ✗ "Great job logging your workout today!"

04 — QUIET INTENSITY

Confidence without volume. State the milestone and let it sit — no exclamation points, no emoji walls.

- ✓ "Forged. Day 100."
- ✗ "🏆 INCREDIBLE MILESTONE UNLOCKED! 🏆"

01 HEAT

The energy that starts the work. Urgency without panic — today's session matters because today is the only day you can act in.

IN THE PRODUCT

- Today's session card lit in lime, everything else dimmed
- Streak flame / heat indicator on the home screen
- Single accent color per screen — never competing highlights

02 PRESSURE

What accumulates. Every logged day adds weight to the next — the stakes of breaking a streak are real and visible, not hidden behind soft language.

IN THE PRODUCT

- Streak counter as a primary, large numeral — Day 47, not "47 days! 🎉"
- Program week progress bars that fill, not refresh
- Resets shown plainly — no apology copy

03 REPETITION

The daily return. Same screen, same rhythm, same single light — consistency is the design, not an add-on feature.

IN THE PRODUCT

- Calendar / streak grid as a recurring visual motif
- Daily mood check-in as a fixed ritual, same position every day
- Recurring program structure — weeks repeat, intensity builds

HOW THEY COMBINE

Heat starts a session. Pressure is what's riding on it. Repetition is what turns one session into a shape that holds. Every screen in Forge AI should be answerable to at least one of these three — if a feature serves none of them, it doesn't belong.

LOGO — PRIMARY MARK

SYMBOL & WORDMARK

THE FORGE

V1 — BRAND GUIDELINES

CONSTRUCTION

The Forge AI mark is a single continuous bolt-stroke — anvil struck by a spark — built on an 8×8 unit grid (6px module). All vertices fall on grid intersections; the strike angle is fixed at 45°. Never redraw freehand.

WORDMARK

FORGE AI

BIG SHOULDERS DISPLAY / 900 / CAPS

HORIZONTAL LOCKUP

FORGE AI

STACKED LOCKUP

FORGE AI

CLEARSPACE & VARIANTS

SIZING & COLOR FORMS

THE FORGE

V1 — BRAND GUIDELINES

CLEARSPACE

Minimum clearspace on all sides equals **X** — the full height of the icon mark. No text, edge, or competing element may enter this zone.

MINIMUM SIZE

DIGITAL — ICON ONLY **24 × 24 px**

DIGITAL — FULL LOCKUP **120 px wide**

PRINT — ICON ONLY **10 mm**

PRINT — FULL LOCKUP **28 mm wide**

COLOR VARIANTS

PRIMARY — LIME ON BLACK

MONO REVERSE — BONE ON
BLACK

STAMP — BLACK ON LIME

OUTLINE — EMBOSSED /
WATERMARK

Use Lime-on-Black by default. Mono Reverse and Stamp variants are for single-color print or merch only. Outline is reserved for watermarks and embossed surfaces — never as a primary mark.

LOGO MISUSE

DON'T DO THIS

THE FORGE

V1 — BRAND GUIDELINES

DON'T RECOLOR

Never substitute the mark's lime fill for arbitrary brand or system colors.

DON'T ADD EFFECTS

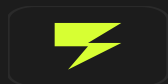

No gradients, drop shadows, bevels, or glow effects on the mark itself.

DON'T ROTATE

The mark sits upright, always. No tilt, even for "dynamic" layouts.

DON'T STRETCH

Scale uniformly. Never distort the proportions of the icon or wordmark.

DON'T ADD A FRAME

Don't outline, stroke, or box the mark beyond its own container.

DON'T LOSE CONTRAST

Never place the mark over busy imagery or low-contrast backgrounds.

COLOR — CORE PALETTE

FOUR COLORS. THAT'S IT.

THE FORGE

V1 — BRAND GUIDELINES

FORGE BLACK

#0A0A0A

Base canvas. ~70% of every screen. Never pure #000.

SPARK LIME

#D7FF33

Primary accent. Today, active, success, the mark itself.

MOLTEN ORANGE

#FF5A2E

Secondary accent. Tags, kickers, secondary CTAs, heat.

BONE WHITE

#F3F3EE

Primary text on black. Never paired with pure white.

DISTRIBUTION

70% — Black

18% — Lime

8%

4%

Black dominates every screen. Lime is reserved for the single most important element per view — never two lime elements competing for attention. Orange marks secondary signals (labels, tags, world-building copy). Bone White carries body text only.

PAIRING RULES

- Lime never sits on Orange, or vice versa — both read as "primary"
- Bone White text on Black only — 13.6:1 contrast ratio
- Black text on Lime or Bone for inverted surfaces

DON'T

- Don't introduce new accent hues without updating this page
- Don't use pure black (#000) or pure white (#FFF)
- Don't tint Black toward blue/warm — keep it neutral

SURFACES & STATES

ELEVATION & SEMANTIC COLOR

THE FORGE

V1 — BRAND GUIDELINES

SURFACE ELEVATION

— BG #0A0A0A — PAGE CANVAS

— SURFACE #151515 — CARDS, PANELS

— SURFACE-2 #1C1C1C — INPUTS, WELLS

— BORDER #2A2A2A — HAIRLINES, DIVIDERS

Each step up adds ~5% lightness. No shadows for elevation — only flat fills and 1px borders, consistent with a single-light-source world.

DISPLAY NUMERAL

47

Streak counts, weights,
timers — always tabular

USAGE

- Headlines, screen titles, streak/PR numerals only
- Always set in UPPERCASE
- Weight 900 for hero numerals, 700–800 for headings
- Line-height ~0.86, let characters sit close

DON'T

- Don't use for body copy or long-form text
- Don't set in mixed case or italic
- Don't use weights below 700
- Don't loosen tracking — it should feel compressed

ROLES

EYEBROW / LABEL	SECTION LABEL // 01	11 px · 500 0.25em tracking · uppercase
BODY	Forge AI is the heat, the pressure, the repetition until something real holds its shape.	13 px · 400 1.5 line-height
EMPHASIS	Streak reset to 0. Today is day one again.	13 px · 700 color carries weight
DATA / NUMERAL	82.5 KG · 5×5 · RPE 8	14–18 px · 600 tabular-nums always on
TAG / PILL	HEAT // PRESSURE	11 px · 500 1px border · 0.2em tracking

USAGE

- Default typeface for all UI – labels, body, data, navigation
- Tabular numerals for anything counted: reps, weight, days, time
- Uppercase + wide tracking signals "system" – labels, statuses, tags
- Sentence case for conversational copy (story, mission, alerts)

DON'T

- Don't mix in another sans/serif typeface anywhere
- Don't use proportional numerals for streaks or stats
- Don't set body copy in all caps – reserve caps for labels
- Don't go below 11px – this is a workshop, not a spec sheet

MOOD CHECK

FORGED DAILY. NEVER FINISHED.

Every screen in Forge AI is a small workshop: one light, one focus, one number that matters today. This board is the foundation — apply it consistently, and let the product feel like the heat it describes.

CHECKLIST BEFORE SHIPPING A SCREEN

- One Lime accent maximum per view
- Big Shoulders Display only for headlines & numerals
- Copy is direct, unsentimental, earned
- Dark canvas, single light source, no clutter
